

Toldya v1.1

Toldya V1.1 — Ultra Lean Product Blueprint

Product Goal

Amaç:

Kullanıcıların hızlı şekilde tahmin oluşturup tahminlere katıldığı bir prediction network oluşturmak.

Temel prensip:

2 tık → prediction
2 tık → stake

1. Core Object

Platformun tek gerçek nesnesi:

Toldya (Prediction)

Schema:

```
id
title
category
creator_id
expiry_time
status
yes_votes
no_votes
created_at
resolved_at
result
```

Example:

Will Apple release an AI search engine before 2027?

2. Prediction Lifecycle

Prediction state machine:

CREATED
ACTIVE
LOCKED
RESOLVED

Lifecycle:

Create
↓
Voting
↓
Expiry
↓
Resolve

3. Voting Model

Para yok.

Sadece:

PEG token

User günlük alır:

1000 PEG

User action:

YES
NO

Stake:

stake PEG

Example:

YES: 6500
NO: 3500

4. Probability Engine

Probability:

YES / TOTAL

Example:

YES = 65%
NO = 35%

Bu zaten kullanıcı için:

crowd prediction

5. Home Screen (Çok kritik)

Ana ekran:

Trending predictions

Kart:

Will OpenAI release GPT-6 before 2027?

YES 62%

NO 38%

votes: 21k

expires: 3d

Buttons:

YES

NO

6. Prediction Creation

Prediction oluşturma:

Title

Category

Expiry

Example:

Title:

Will Nvidia become the most valuable company by 2030?

Category:

Technology

Expiry:

2030

7. User Profile

Basit profil:

```
username
accuracy
predictions_count
win_count
ranking
```

Example:

```
Accuracy: 68%
Predictions: 124
Rank: #92
```

8. Leaderboard

Global leaderboard:

```
Top predictors
```

Ranking:

```
accuracy
```

Example:

```
#1 Tech0racle
Accuracy: 81%
```

9. Prediction Discovery

3 feed yeterli.

```
Trending
Newest
Ending soon
```

10. Resolution

Prediction çözümü.

Admin panel:

```
Resolve prediction  
YES  
NO
```

Kaynak:

```
official data  
news  
statistics
```

11. Share Feature

Prediction share:

```
"I predicted YES on:  
  
AI replaces software engineers by 2035"
```

Share format:

```
image card
```

Bu **viral growth** için önemli.

12. Gamification

Minimum gamification:

```
levels  
badges
```

Example:

Level 1 Predictor
Level 2 Analyst
Level 3 Oracle

13. Toldya V1.1 UX

User journey:

Open app
↓
See prediction
↓
Tap YES
↓
Done

Bu kadar.

14. Tech Architecture

Minimum architecture:

Mobile App
↓
API
↓
Prediction service
↓
Voting service
↓
Resolution service
↓
User service

Database:

Postgres

15. Data Model

Minimal tables:

users
predictions
votes
resolutions

16. AI Kullanımı (V1.1)

İlk versiyonda AI şart değil.

Ama küçük bir şey eklenebilir:

AI prediction suggestions

Example:

Trending topic → prediction suggestion

17. V1.1 Scope

Bu özellikler yeterli:

Create prediction
YES / NO vote
Probability
Expiry
Resolution
Leaderboard
User profile

18. V1.1'de Olmayacak Şeyler

Özellikle **çıkarmak** önemli:

arguments
comments
order book
liquidity pool
discussion threads
AI debates
complex markets

19. V1.1 Timeline

Bu ürün:

3–4 hafta

içinde çıkabilir.

20. North Star Metric

Toldya için:

Daily predictions created

ve

Votes per prediction

21. Long Term Vision

Eğer büyürse:

global prediction network

Example:

1M predictions
50M users

Çok Kritik Tavsiye

Prediction app'lerin en büyük hatası:

çok karmaşık ürün

Oysa doğru model:

Twitter simplicity
+
prediction mechanic

Toldya — Viral Prediction UX (Screen by Screen).
